

As the Administrator of the institution, I feel very much pleased and yet humbled to be part of the making of this state of the art educational facility. This educational complex has a total surface area of a 7720m<sup>2</sup> and has full holding capacity of 900 students. Situated next to the orphanage, the school officially opened up its doors to the public in January 2013 and is growing from strength to strength. The school comprises of 28 well built and well ventilated classrooms or facilitation rooms. Over and above this, there is a music room, art room, computer laboratory, gymnastics room, administration facility, modern sports fields as well as neatly done swimming pools. The school also boasts of a modern library well equipped with teaching and learning material. Our primary school serves to equip students with cognitive, psycho-motor and affective skills or domains as we believe these will allow them to think critically and creatively as they meet the day to day challenges associated with changes in global and in technological advancement of the modern society. I therefore hope and trust you shall enjoy yourself navigating through the website.
